

CARBON REDUCTION PLAN

Eliminate	Business decisions to avoid doing the thing that causes emissions e.g. business change encouraging Teams meetings, travel management - use pool cars to and encourage public transport.
Reduce	Actual reduction in carbon and energy. Introducing energy saving principles and digital enablers e.g. LED bulbs, efficiency cars, switching off lights, machines when not in use.
Substitute	Switching products for lower carbon products such as zero carbon electricity tariffs or supplies.
Compensate	Reduce effect of emissions elsewhere e.g. high-quality carbon offsetting
